

DHRUVI S.

AI & ML Developer

EmailId: hello@kadders.com

GitHub: github.com/dhruvishah85

Professional Summary

AI-focused Software Developer with 1+ year of experience in backend development, AI integrations, and automation. Experienced in Python and Node.js for building scalable APIs, automation workflows, and intelligent applications. Skilled in LLM integrations, NLP solutions, vector databases, and AI chatbot development. Strong foundation in data structures, MLOps concepts, and prompt engineering, with hands-on experience integrating AI models such as OpenAI, Gemini AI, and other LLM-based APIs. Passionate about building intelligent systems that automate processes and improve user experiences.

Core Skills

Programming & Development:

- Python, Node.js, JavaScript, FastAPI, Express.js

AI & Machine Learning:

- Large Language Models (LLMs), Natural Language Processing (NLP), AI Automation, Prompt Engineering, AI Integration (OpenAI, Gemini AI, HuggingFace APIs)

Data & Infrastructure:

- Data Structures & Algorithms, Vector Databases, PostgreSQL, MySQL, MongoDB

AI & Bot Development:

- AI Chatbot Development, API Integrations for AI Models, Voice Assistant Development

Tools & DevOps:

- Git, GitHub, Docker, Postman, CI/CD, MLOps Concepts

Strengths

- **AI Integration Expertise**
 - Strong ability to integrate LLM APIs and AI services into real-world applications for automation and intelligent workflows.
- **Problem Solving & Data Structures**
 - Solid foundation in algorithms and data structures that support efficient and scalable software development.
- **Automation & AI Workflows**
 - Experienced in building automation pipelines and AI-driven systems that reduce manual effort.
- **Backend System Design**
 - Capable of designing secure and scalable backend systems using modern frameworks and database technologies.
- **Quick Learner with AI-First Mindset**
 - Quickly adapts to new AI tools, frameworks, and development workflows while continuously improving technical skills.
 -

Project Details

- **AI Resume Analyzer**
 - **Technologies: FastAPI, NLP, PostgreSQL**
 - Developed an AI-powered system that analyzes resumes and matches them with job descriptions.
 - Implemented NLP pipelines for text extraction from PDFs and skill identification.
 - Built a semantic matching algorithm using cosine similarity to score resume-job compatibility.
 - Designed backend APIs for real-time resume analysis.

- **AI Text Summarizer**
 - **Technologies: Node.js, HuggingFace API**
 - Built an AI-based text summarization platform using HuggingFace transformer models.
 - Developed backend APIs to process and summarize large text inputs.
 - Implemented optimized request handling for faster response generation.
- **Jarvis AI – Voice Assistant**
 - **Technologies: Python, Speech Recognition**
 - Developed a voice-enabled AI assistant capable of executing user commands.
 - Integrated speech recognition and text-to-speech technologies.
 - Built automation features triggered by voice commands.
